

Manifest XR VR Box Configurations

Portable 10-headset VR deployment kits for education, learning and development

PLATFORM OPTIONS

Meta Quest 3

Meta Quest 3S

Pico 4 Ultra

INCLUDED IN EVERY BOX

10 VR headsets

Integrated charging
flight case

Dedicated router

Ready-to-deploy
setup

What Is Inside Every VR Box

A complete portable VR deployment kit designed for education, learning and development.

10 VR Headsets

A complete class or cohort set.

Charging Flight Case

Storage, transport and charging in one unit.

Dedicated Router

Local connectivity for synchronized deployment.

Pre-configured Devices

Named, organised and ready for use.

Cleaning & Hygiene Workflow

Supports repeatable shared use.

Operational Readiness

Built for easy setup and deployment.

Platform Configurations

Choose the hardware option that best fits the deployment, experience level and learning outcome.

Meta Quest 3

Higher-spec mixed reality headset for premium immersive deployments.

Meta Quest 3S

Cost-effective headset for scalable education and training.

Pico 4 Ultra

Alternative all-in-one platform for immersive content deployment.

10 VR headsets

Integrated charging flight case

Dedicated router

Ready-to-deploy configuration

Each box includes 10 headsets, integrated charging, dedicated router and ready-to-deploy configuration.

Solutions **by** Vertical

Configure each VR box around the environment, learner group and deployment goal.

K-12 Education

Immersive curriculum support for schools and future-focused classrooms.

Vocational Training

Practical skills development through guided, repeatable simulation.

Enterprise Soft Skills

Immersive communication, leadership and workplace training.

Industrial Health & Safety

Hazard recognition, procedural rehearsal and workforce preparedness.

The same hardware platform can be tailored to different content pathways and learning journeys.

K-12 Education

VR as an engagement, exploration and reinforcement layer for classroom learning.

Virtual reality supports K-12 education by making concepts tangible, sparking curiosity and reinforcing learning through immersive experiences.

Interactive Learning

Make abstract concepts visual and spatial.

Curriculum Support

Align VR experiences to subject objectives and lesson flow.

Safe Exploration

Visit places, systems and scenarios beyond the physical classroom.

Repeatable Engagement

Revisit experiences to support discussion, reflection and understanding.

Vocational Training

VR as a preparation, practice and reinforcement layer

Virtual reality supports vocational education by adding safe, repeatable and guided practice to teaching and workshops.

Safe-to-fail

Experience hazards and complex situations without creating real-world risk.

Learn by doing

Students act, decide and receive feedback instead of only watching.

Repeatable practice

Repeat scenarios until confidence and procedural fluency improve.

Data-rich delivery

Completion, errors and skill gaps can become visible to educators.

Core Use Cases for Vocational Training

Examples of vocational pathways that can be supported through immersive learning.

Trade Skills Training

Practice hands-on techniques for carpentry, welding, robotics and drones in risk-free virtual workshops.

Healthcare & Nursing Assistance

Simulate nursing assistant and medical assistant tasks, emergency response and patient care conversations.

Agriculture & Life Science

Run scenarios covering tractor maintenance, livestock identification, PPE use and accident prevention.

Career Exploration

Experience 360-degree workplace tours and job shadows in manufacturing, construction and automotive settings.

AI Job Interview Rehearsal

Practise professional communication and job interviews with AI-powered conversational tutors.

Enterprise Soft Skills Training

Use immersive learning to build confidence, communication and workplace readiness.

Communication

Practise conversations, listening and interpersonal skills.

Leadership

Rehearse management situations, coaching and team guidance.

Customer Service

Build confidence in service scenarios and response handling.

Interview & Presentation Skills

Develop professional communication in realistic rehearsal environments.

Implementation Roadmap

A controlled route from technical readiness to live delivery and ongoing support.

The goal is simple: a technically ready kit, confident facilitators and a repeatable learner experience.
